

Wireframe 1 — Browse Animals page

Annotations

- (1)- The search bar is always on the top – Emily can search by name or breed without scrolling.
- (2)- Left sidebar filter panel is visible (not collapsed) – reduces load for the first time users like Emily.
- (3)- Filters match Emily's goals: species, age, size – she can narrow results to find a compatible pet.
- (4)- Animal cards show key info at a glance – each card links to a full profile page.
- (5)- Result counts are shown – reassures Emily that if the current options are too narrow she has other options.
- (6)- Back end: results are dynamically fetched from database.
